Intelligent
Ops

- ✓ Multi-dimensional data collection, centralized management, and correlation analysis **significantly reduce the efforts of manual troubleshooting.**
- ✓ An integrated platform combining network monitoring, flow analysis and log management helps **cut down the cost of purchasing multiple tools.**
- ✓ Real-time detection of abnormal traffic, combined with threat intelligence matching, **enables early alerts and collaborative defense to threats.**

N-Partner - the trusted partner of IT professionals

N-Partner is a Taiwanese-based developer specializing in high-performance big data collection, storage, integration, and analysis, alongside the deployment of AI technology. Our solution is trusted by government agencies, educational institutions, financials, multinational corporations, hospitals, and telecoms. N-Partner supports over 1,000 organizations in optimizing IT operations and strengthening cybersecurity. We are also proud recipients of the Taiwan Excellence Award and the Taiwan SMEs Innovation Award. Our presence continues to grow across East Asia, Southeast Asia, and Central Asia.

Once a Tool, Now Wise and Cool

AI-powered N-Robot, now more proactive than ever

N-Robot, N-Partner's smart assistant, now comes with enhanced AI capabilities. It monitors your network in real time, detects anomalies, sends alerts, and helps IT professionals maintain full visibility into network activity and respond to threats quickly and effectively.

An upcoming update will introduce **AI Report**, offering security analysis and action plans to support a more intelligent and efficient IT workflow.

Unusual traffic detected.
